# ABOUT OMTECH

OMTECH ELECTRIC INDUSTRIES, established in 2020, operates under the supreme guidance, vision and leadership of Mr. Ramchandra Saini, who brings over 35 years of experience in manufacturing various types of electric panels. Our unwavering commitment to quality has enabled us to provide top-notch products and services to a diverse clientele, ranging from private companies to governmental organisations, both within our home country and abroad. This dedication is further highlighted by our ISO 9001:2015 certification, affirming our allegiance to the highest standards of quality management and customer satisfaction.

## Our Vision

Our goal is to lead the way in electrical manufacturing, becoming the benchmark for quality and service everyone looks up to. We're all about pushing forward, making sure every product we make sets the stage for brighter projects everywhere.

## Our Mission

Our mission is to ensure every product from our production line isn't just good, but the best in its class. We are dedicated to achieving client satisfaction by adhering to the highest standards of quality, efficiency, and reliability.

## OUR PRODUCTS

# INNOVATION THAT ENERGIZES INDUSTRIES

### APFC PANEL

The APFC Panel is an energy-saving powerhouse, designed to maintain a higher power factor, minimising energy loss and providing benefits such as penalty avoidance for low power factor and optimization of the connected load.

### MCC (MOTOR CONTROL CENTER)

This panel forms the hub for power distribution to electric motors, featuring a robust steel structure, motor control units, and comprehensive wiring and busbar systems for effective motor management.

### POWER CONTROL CENTER

Our PCC Panels ensure reliable operation with features like desired breaking capacities, adequate space for cable termination, and type two coordinated starters, along with other standard provisions such as space heaters and busbar supports.

### LT DISTRIBUTION BOX

Ranging from 10 KVA up to 400 KVA transformer capacity, these boxes are equipped with MCCBs, Energy Metres, CTs, and Bus Bars, providing a comprehensive solution for power distribution needs.

## OUR PRODUCTS

# INNOVATION THAT ENERGIZES INDUSTRIES

### 11KV & 33KV BUS DUCTS

Customizable to client requirements, these bus ducts are crucial for efficient power transmission and are designed for easy integration into various electrical systems.

### 3 PH FEEDER PILLARS / SERVICE PILLARS

These units come with SFUs as incomers and Porcelain Kit Kats / HRC Fuses as outgoings, ensuring safe and reliable electrical distribution.

### METER & PROTECTION PANELS

These panels are designed for 1 Ph / 3 Ph CT operated Electronic Energy Meters, supporting up to 30 meters, offering a blend of functionality and technical precision.

### LT CURRENT TRANSFORMERS

Available in tape wound and epoxy resin types, they are essential components for accurate current measurement and protection in electrical circuits.

## OUR PRODUCTS

# INNOVATION THAT ENERGIZES INDUSTRIES

### HEAVY DUTY FIRE HOSE BOX CABINETS

The Fire Hose Box (Heavy) is a critical component of fire fighting equipment, specially designed to provide robust and secure storage for fire hoses and related accessories. Its heavy-duty construction ensures durability and resilience, making it ideal for demanding fire-fighting environments. With its double door design, this hose box offers easy accessibility to essential firefighting equipment.

### HEAVY DUTY STORAGE RACK

Smart Solution for Storing Medium To Heavy Weight Items  
Heavy Duty Storage Rack augments the functionality and speeds up operations of a warehouse, production facility and more. This multipurpose shelving solution has a huge demand these days

# WHY PEOPLE CHOOSE OMTECH

## Decades of Excellence

With a heritage spanning thirty years, we've become synonymous with electrical excellence. Our journey is marked by countless successful projects that showcase our depth of expertise and adaptability to evolving industry trends.

## Prestigious Clientele

The trust placed in us by industry titans like NTPC and Tata Power is not just an honour but a proof of our commitment. Our collaborations with such prestigious clients reflect the confidence they have in our ability to deliver superior quality consistently.

## Global Footprint

Our portfolio includes projects that illuminate various corners of the globe. From the highlands of Bhutan to the shores of South Africa, our international presence underscores our adaptability and the global trust in our capabilities.

## Quality Control

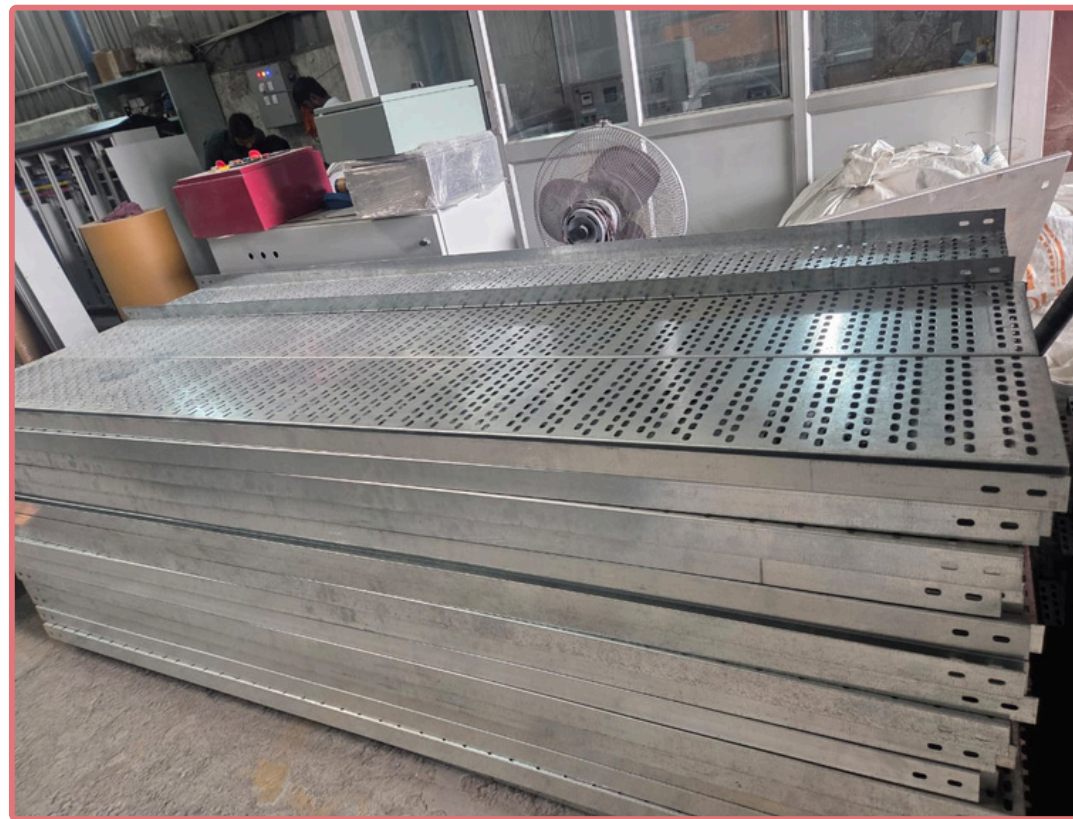

Quality at Omtech is integrated into every process. We go above and beyond to ensure that each product not only meets but exceeds industry standards, delivering performance that our clients can depend on.

## CABLE TRAY

# STRENGTH IN EVERY CONNECTION

Omtech Electric Industries delivers durable cable trays ensuring safe, organized wiring management with corrosion resistance, easy installation, and long-lasting performance, supporting efficient power distribution across industrial, commercial, and residential electrical projects.

## OUR MACHINERY

# MACHINERY USED FOR EVERYDAY CHALLENGE

### CNC Press Brake Machine

The CNC Press Brake Machine offers unparalleled bending accuracy, thanks to its computer-controlled operation. This allows for highly precise bends, essential for creating components that fit perfectly in their intended applications.

### Hydraulic Shearing Machine

Our Hydraulic Shearing Machine provides clean and straight cuts with its powerful cutting action. This machine is crucial for processing materials quickly and efficiently, ensuring every piece meets our strict quality standards.

### MIG Welding Set in 250 Ampere

The MIG Welding Set provides strong and durable welds with its 250-ampere capability. This welding set is essential for joining components securely, ensuring the structural integrity of our products.

## OUR MACHINERY

# MACHINERY USED FOR EVERYDAY CHALLENGE

### **Power Press in 100 Ton/ 30 Ton / 10 Ton**

This heavy-duty Power Press has a 100-ton capacity, ideal for large scale and high-pressure forming. Its robustness and precision are key for manufacturing durable components that withstand the test of time.

### **Radial Drill Machine 40 mm Capacity**

Our Radial Drill Machine offers exceptional drilling capabilities, with a 40 mm capacity. It's designed for precision drilling on a variety of materials, ensuring accurate and consistent holes for assembly and construction.

### **CNC Laser Cutting Machine**

Our CNC Laser Cutting Machine uses advanced laser technology for precise cuts, ensuring high accuracy and smooth finishes on all materials.

## OUR SERVICES

# COMPLETE ELECTRICAL SOLUTION, ZERO COMPROMISE

### Manufacturing

Manufacture Omtech Machines such as CNC Press Brake machine, Hydraulic Shearing machine, MIG Welding Set in 250 Ampere, CNC Laser Cutting Machine, Radial Drill Machine 40 mm Capacity, etc.

### Repair and Maintenance

Offering Omtech equipment repair services, such as routine maintenance, refurbishing, and troubleshooting to guarantee peak performance.

### Custom Solutions

Creating and constructing Omtech solutions that are specifically suited to the needs of clients.

### Training

Providing clients with instruction on how to operate and maintain Omtech equipment.

## OUR FACILITY

Our facility includes Power Coating Facilities to enhance product durability and appearance, protecting against corrosion and wear. Our selection of top-tier machinery reflects our commitment to quality, precision, and reliability. At Omtech Electric Industries, we leverage advanced technology to lead in electrical manufacturing, ensuring our products meet the highest standards of excellence.

## OUR TEAM

Omtech is propelled by a team of 55 seasoned professionals—each one is an expert in their area, whether it's CNC programming, quality control, or any of the many steps in our manufacturing process. They collaborate flawlessly, ensuring that every product we create reflects their skill and precision. Their commitment is what makes us successful, and it's their expertise that allows us to deliver the precision and perfection we're known for. This team makes us who we are, setting the bar high in everything we do.
